## Fight rising prescription drug costs with The Insurance Exchange Discount RX Card.

When you present this card to your pharmacist, their computer system will automatically compare our discounted rate to the pharmacy's retail price. You will pay the lower of the two prices directly to the pharmacy at the point of sale.

Even if you have insurance already, this card might lower the drug cost below your copay. In addition, if you have an HSA or deductible/coinsurance pharmacy benefit, you still might end up paying less.
